LED shadowless operating lamp

Precise dimming control for various lighting request

Using HFMED's original high-density light mixing technology, it provides high brightness and high light quality at the same time, and its illuminance $\geq 110,000$ lux with 8 levels of brightness adjustment, 3 levels of color temperature adjustment as $3800K-5000K \pm 300$, and electronic spot size adjustment of 130 -160mm, also it's with ENDO Mode.

Original thermal management system to effectively reduce the temperature of chip core

The cast high-heat-conducting aluminum alloy radiator increases the internal heat-dissipation area, which can instantly derive heat, and with high-efficiency LED bulbs, allow to effectively reduce the temperature of the lamp and improve the service life of the lamp.

Superior laminar flow design

The streamlined lamp body design and careful assembly can increase the flow efficiency of the airflow and remove the dust and bacteria around the lamp body.
