VETERINARY PRODUCTS

ACCESSORIES

|			
Y breathing circuit	Coaxial breathing circuit	Waste gas hose	Oxygen hose
Endotracheal tube	Non-rebreathing circuit	SD35 trolley	SD30 trolley
Anesthesia face masks	Breathing Bags	Endotrachealtube support	Oxygen face masks

AM70
VETERINARY
ANESTHESIA MACHINE

- Ultra-compact design & multiple installation methods save more space of operating rooms.
- 10 inches screen, clear observation. touch screen, smooth and simple operation.
- Minimum 5ml tidal volume better supports small animals.
- Turbine drive, no need to configure drive gas, realize low-cost anesthesia.
- Integrates 2 auxiliary power outputs for easy device integration.
- Support VCV, PCV, VS, SIMV multiple modes.

AM30
VETERINARY
ANESTHESIA MACHINE

- Ultra-compact design & multiple installation methods save more space of operating rooms.
- Selectatec vaporizer, quick change.
- ACGO switch, switch between rebreathing anesthesia and non-rebreathing circuits in one step.
- Equipped with oxygen pressure gauge and safety valve to ensure the safety
- Pre-calibrated APL valve precisely sets maximum airway pressure.
- 1400ml large capacity CO2 absorber canister.

VR30
SERIES VAPORIZERS

- Selectatec and Cagemount two installation methods.
- Sevoflurane,Enflurane, Isoflurane optional.
- Keyfill, Easyfill, Quickfill, Pourfill optional.
- Flow, pressure and temperature compensation ensure accurate output.

AM10
VETERINARY ANESTHESIA MACHINE

- Ultra-compact design & multiple installation methods save more space of operating rooms.
- Oxygen pressure gauge and safety valve ensure the safety.
- Selectatec vaporizer, quick change.
- Up to six channels can be flexibly configured.

PA50

PATIENT PRESSURE ALARM

- Multiple alarm gears can be set with an accuracy of 5%.
- Standard 9V battery.
- Small and compact size, flexible and convenient installation.
- Low battery alarm.

BN30

BAIN BLOCK

- High precision airway pressure gauge, 0-100cmH2O.
- Pre-calibrated APL valve to accurately set airway pressure in one step.
- The APL button can quickly increase the airway pressure by about 30cmH2O.
- Perfect fit for AM30 anesthesia machine.

PA30

OXYGEN PRESSURE ALARM

- Automatic alarm below 200kPa
- Standard 9V battery.
- Small and compact size, flexible and convenient installation.
- Low battery alarm.
